

UDOMSEYMA SREANG

Mechanical Engineering Student | MEP Engineering

Institute of Technology of Cambodia (ITC), 4th Year

Email: ahseyma135@gmail.com | Phone: 011 384 576 | Phnom Penh, Cambodia

PROFILE

4th-year Mechanical Engineering student at ITC with practical MEP internship experience at MT Engineering. Interested in mechanical building services, fire protection, site coordination, engineering drawings, inspection/testing, quantity take-off and technical documentation. Eager to build strong practical engineering experience and contribute to MEP projects.

EXPERIENCE

MEP Engineering Intern — MT Engineering (Cambodia) Co., Ltd.

Jul 2026 – Present

- Supported MEP site activities and mechanical/fire-protection work.
- Participated in site inspection, coordination and checking installation conditions.
- Tested water pressure as part of fire-protection/water-system inspection.
- Performed quantity take-off for pump-room-related work.
- Reviewed fire alarm device locations and identified issues involving smoke/heat detectors, MCP and FACP.
- Learned fire-protection components including fire pumps, jockey pumps, valves, flow switches, tamper switches, standpipes, hose valves, FDCs and fire-water tanks.
- Prepared findings, risks, recommendations and follow-up actions.
- Applied site safety awareness and technical documentation practices.

EDUCATION

Institute of Technology of Cambodia (ITC) —
Mechanical Engineering — 4th Year.

Somdech Dejo Hun Sen Suong High School — 2017–2022.

TECHNICAL SKILLS

- Mechanical Engineering
- Fundamentals
- MEP Engineering
- HVAC Fundamentals
- Fire Protection
- Fire Alarm Systems
- Sprinkler Systems
- Fire Pump & Jockey Pump
- Fundamentals
- Standpipe/Hose Valve/FDC
- Water Pressure Testing
- MEP Quantity Take-Off
- Engineering & Shop Drawings
- Site Inspection & Coordination
- Technical Documentation
- RFI
- Method Statement
- As-Built
- Clash Awareness
- Site Safety

UDOMSEYMA SREANG

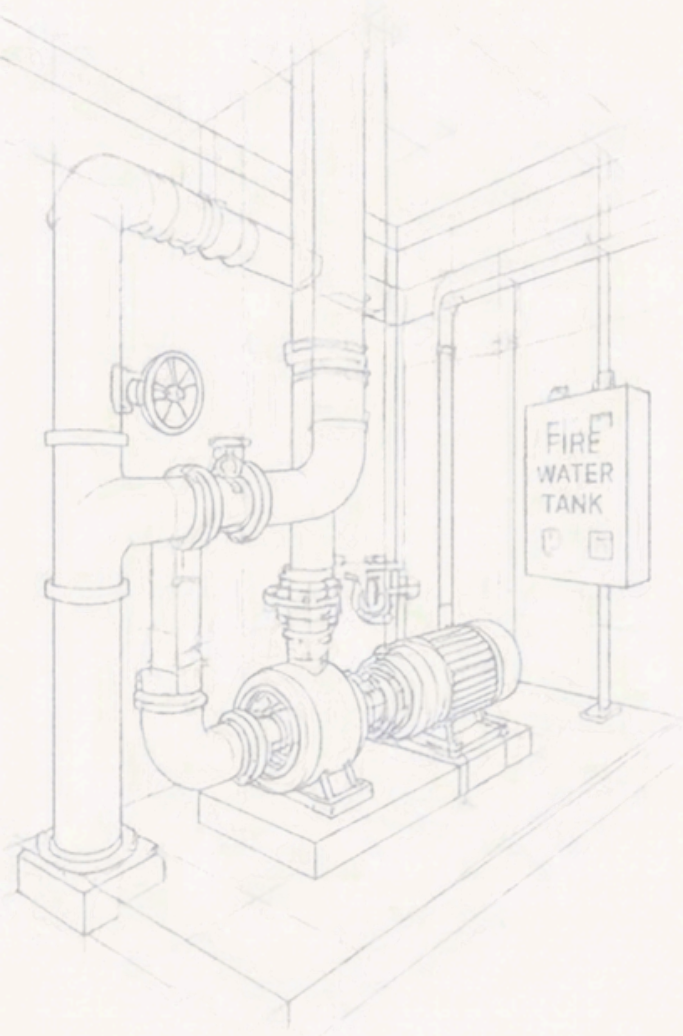

MECHANICAL ENGINEERING | MEP

SOFTWARE

AutoCAD; SolidWorks.

NFPA / MEP KNOWLEDGE

NFPA 14; NFPA 72; NFPA 5000 awareness.
Gate valve; check valve; Y-strainer; relief valve; flow meter; DN notation; FACP; MCP; flow switch; tamper switch; fire-water tank; sleeves; hangers; supports; shafts; plant rooms; penetrations.

PROJECT EXPERIENCE

Outdoor Gear — MEP / Fire Protection Site Project

- Reviewed fire-protection and fire-alarm installation conditions.
- Identified site findings involving detector type/location, MCP location and FACP placement.
- Documented risks and recommended corrective actions.

OTHER PROJECTS

- Scotch Yoke Mechanism — SolidWorks design and analysis.
- Mechanical CAD Modeling — 3D parts and engineering drawings.
- Robot Competition — frame assembly and motor integration.

ADDITIONAL EXPERIENCE

- Junior Tutor — supported junior students.
- Barista — WW Coffee & Pastry — customer service, cash handling, teamwork and daily operations.
- District Best Student Exam in Mathematics — Participant.

PERSONAL STRENGTHS

Quick learner; responsible; teamwork; communication; problem solving; attention to detail; willing to learn on site.

LANGUAGES

Khmer; English; French.
